

On-Prem Device Farm

To tackle sophisticated test cases with manual testing on **real devices** or run massive number of automated tests in **parallel**.

On-prem solution

Has never been easier to have a device farm in your own location.

Automated Testing

Test your app in parallel against your own device farm.

Cost Effective

Best pricing in the market based on features.

Built-in Inspector

No need for Appium Desktop installation all you need is your browser to start writing test automation.

Benefits of real device testing on device farm

With Visium Farm on-prem solution at the most affordable cost, own your device farm!

Get the most from automation

Test automation can reduce the time required to run repetitive tests. However, with the power of Visium Farm, you will have the chance to multiply the output.

No more devices in drawers

Collect your mobile devices from testers and developers' drawer. Plus, centrally manage and share all these assets.

Test your app as in your hands

Unlike emulators, testing on real mobile devices always provides more detailed results about your app and resource usage, also it helps you to analyze the real end-user experience more productively.

Spend less

Sharing the same device with diverse stakeholders increases the utilization of each device while decreasing the need of having many devices.

Features

Scalable Architecture

Scalability with server and client mode. Devices connected to the server can also be used for testing.

Live and Automated Testing

Either run your live manual tests on an individual test device or run your automated tests on a massive amount of devices in parallel.

BDD & Visium GO support

All test automation frameworks supporting standart appium JSONWP Protocol, can be easily integrated

LDAP Integration

Use your LDAP server or Microsoft Active Directory as the master source of user data along with internal user repo.

Multilingual Support

Already supported in 3 languages. Flexible architecture to add new ones.

Reporting

Leverage detailed reports to get a better result.

App Library Management

Keep all of your apk and ipa versions in the same library.

REST API Support

Consume all of your farm functionality through well-designed API endpoints
