

Test Case Management Software

Test case management tool

to centrally organize and streamline your testing process. Manage requirements, test scenarios and suites, make and track test plans, get reports, establish relationships between requirements and test scenarios, track risks and bugs.

All in one pack

Establish relationships between releases, requirements, test cases, and bugs. Attach risk score mapping to your requirements to decide what to test first or do not release without critical ones addressed.

Track all the work

Keep test execution history in detail with all the proof items attached, such as screen shots or recordings. Record all changes done at any attribute level with a timestamp and ownership info.

Designed to be part of agile development

Tight integration with Jira, makes testing part of Agile Development. As soon as bugs are discovered, related defects can be created instantly in Jira so developers can act on it.

Benefits of test case management

Calculated risks make difference, when you make your test plan. Categorize your test cases based on their risk and do not release your software without executing the most critical test cases.

Write once execute several times

The central memory of your test activities. Keep all your test cases and scenarios with change history, and share them between projects avoiding rewriting effort.

Keep track of your proofs

Answer the questions of Who, When, What around testing, attach logs and proof files to all your test activity.

Collaboration is the key

Keep all different stakeholders of SDLC in sync, starting from testers and analysts to developers. Accelerate communication in between. Knowledge grows when it is shared.

Features

Intuitive Navigation

Keep your requirements, test cases, releases and executions in the way you prefer. Has smart search option to reach what you are looking for at the lightning speed.

Custom Fields

Flexibility to add custom attributes to your projects, requirements, test cases unique to your own needs. Custom attributes would be several types, Text, Date, Checkbox, e-mail etc.

Risk Score Display

Attach risk values to each and every requirement to make accurate go no-go decisions for your releases.

Shortcuts to Speed Up

Keyboard short cuts to speed up the end user data entry. Options to key in your test cases in free text format or in tabular format.

Real-Time Jira Integration

Has real-time integration with Jira defects, issues, and releases.

Instant Notifications

Has instant notifications when any changes occurs on the documents you work.

Custom Dashboards

Create custom dashboards and share with your team.

Advanced Reporting

Get advanced reports with Visium query builder.
